About Soorty:

Soorty is a family of engineers and designers who are passionate about creating denim that makes people look and feel good by imbuing its core values of innovation, design and sustainability. Believing that sustainable denim needs to be manufactured at scale, Soorty is using its comprehensive vertically integrated infrastructure spanning Pakistan, Turkey and Bangladesh to do just that. The company offers LEED certified production in cost-leading countries Pakistan and Bangladesh, a co-creation development facility in the hub of denim innovation Turkey, and design centers in the denim fashion hubs of the world - New York and Amsterdam. It has developed a strong foothold in European and US markets, producing for high street as well as premium brands in these regions.

Soorty is the only company to have LEED Platinum and Cradle2Cradle Gold certification across both its denim fabric mill and garment factory, a testament to its commitment to the circular economy and mass sustainable production.

Soorty uses its extensive factory floors as spaces for social change. Under its Prism Project, it has hired hearing impaired individuals in high-noise areas in its laundry, flipping disabilities into strengths. Its SEWS program uses a traveling street theater to sensitize male members of under-privileged households to the benefits of female employment, in order to bring a paradigm shift in women labor force participation in Pakistan.

Soorty Organic Cotton Initiative, SOCI, is Soorty's recent venture into organic cotton farming. Covering 1000 farmers, SOCI will not only build capacity for organic cotton, but also enhance livelihoods through financial inclusion, women vocational training and access to clean water.

NASDA Green Energy limited is Soorty Group's venture into wind power. Starting September 2021, this will produce 50 MW of renewable energy for evacuation through the national grid to unelectrified rural neighborhoods.
